SANITARY WARES CATALOGUE

October 2021

Table of Contents

Product Excellences

In order to maintain product quality and consistency, AER is compromising our products to have constant ongoing investment in research and development, supported with strict testing and uncompromising quality control system.

We have been trusted by customers and real estate developers to supply bathroom fixtures and accessories to lots of hotel chains, residential, and commercial projects in Indonesia. Every product becomes a real synthesis of quality, design, and style to adapt modern and stylist lifestyle.

Sustainable development is our company's core idea, we always working hard on living with the eco-environment friendly & harmony. A variety of color combinations and unique design have become the mainstream of fashion family.

Ceramic Material

We always use finest cut of ceramic material to all sanitary ware products. We produce our products with consistent high temperature and microcrystalline nano glazed. To strengthen its quality, we glaze it with multi-layer to create strong and solid product. The result is not only created strong and smooth surface, but also delicately white and bright colour.

Dual Glazed Design

Dual glazed design is one of our main features to our sanitary ware product. With high quality of craftsmanship, we use it to form smooth and delicate surface. This design helps to eliminate hidden voids, forming partition wall, and also eliminate adhesion of dirt. The result is a product that simple and easy to clean, creating convenient use for our customers.

Extra Strong Cyclone Flush

Extra Strong Cyclone Flush is our newest technology that produces powerful cyclone swirling. With less amount of water, this system allows to completely clean the toilet bowl quietly with consistent performance. Only one flush is needed to clean down the waste buildup. The new rimless design makes the maintenance is much easier.

Eco Flush

We engineered to efficiently decrease of unnecessary water output while consistently keep the flushing power to make your home more sustainable and cost friendly. Not like gravity-assisted flushing system, our Eco Flush system strongly clean down the waste buildup but efficiently use lesser amount of water with two-options 3 liters and 4.5 liters per flush.

Sanitary Ware Product Advantages

Our products focused in comfortable use, and at the same time take into consideration of the water saving and environmental protection.

Our products are combination of high tech systems, such as mute technology, eco water saving technology, product shining plating technology, and smooth technology.

Export Quality

Products have been certified to export through worldwide market.

PUB Certified

Certified for pass test from Singapore's National Water Agency.

Chemical Product Resistant

Our basin is able to maintain its original properties after being exposed with chemical substance for a period of time.

Scratch Resistant

Our basin surface is resistant to scratches, marks or damages.

Light Fastness

Resistance to fading, yellowing, or darkening.

Heat Resistant

Extreme heat will not interfere its durability.

High Quality Material Selection

It adopts finest selection of porcelain clay, which produced by multi-process and high-temperature moulding. Its durability is unquestionably.

Easy to Clean

Smooth surface helps to clean so easily.

High Temperature Process

Our urinal is fired twice at high temperature of 1280°C to produce great density and no cracking.

Multi-Layer Glaze

The surface is smooth and delicately white and bright. From high temperature ceramic and microcrystalline nano glazed, strong multi-layer glaze is created to prevent contamination.

Soft Close

Uses physical buffer method to reduce closing speed of cover and seat, and avoid hard impact.

Extra Strong Cyclone Flush

Water flow from the depth of the toilet is through directly to the bottom. With super strong flushing force, able to thoroughly, quietly, and powerfully clean.

Dual Flush

To improve water efficiency, our toilet provides two type of flushes. 3 Liter and 6 Liter tanks.

5 Years Toilet Warranty

5 years Flushing System warranty for One Piece Toilet.

PP Toilet Seat

PP toilet seat is a strong and tough material so that not easy to break. Slim shape and shiny surface.

1 Year Warranty

1 year Smart Toilet Seat & Cover warranty.

Dual Glazed Design

Double glazed surface forms a smooth surface, eliminating hidden voids and forming partition wall, also eliminating adhesion of dirt.

Finest Design

Designed with high quality craftsmanship and best aesthetics. Simple and easy to clean, creating convenient use for you.

Sensor Technology

Using proximity sensor and mechanism to accurately response to the presence of hand or in close proximity.

1 Year Sensor Warranty

1 year Sensor Module & Solenoid Valve warranty.

Eco Flush

This engineering efficiency decrease the demand for unnecessary water to make your home more sustainable and environmental friendly. There are 3 Liter and 4.5 Liter tanks.

1 Year Toilet Warranty

1 year Flushing System warranty for Two Piece Toilet.

UF Toilet Seat & Cover

Urea toilet seat is environmental-friendly, non toxic and odors material. Texture like ceramic, scratch resistance, no yellowing, and easy to clean.

S-Trap

Water seal depth of our s-trap system is over 55mm provides strong odor proof performance.

Inner Wall Pipe Smooth and Stain Resistant

The inner wall diameter of pipe is more than 50 mm, which exceeds the industry standard. Due to more powerful water outlet, the sewage comes out smoother.

SNI Certification

Our sanitary products have passed leakage and drainage tests, non-hazardous chemical test, & mechanical and performance tests.

Microcomputer Control Technology

Our sensor offers severe microcomputer control technology which able to precisely measure the duration and frequency of use, with an accurate volume of flush.

2 in 1 Flush Features

Our sensor urinal flush features 2 in 1 functions of sensor detection and also manual button flushing system to suit your preferences.

Wash Basin

Our wash basin is shaped through elegant lines & edges, made from solid surface material which able to hold impacts from hard objects without cracking the surface. Perfectly designed with smooth surface which make it easily to clean.

Extra Strong **Cyclone Flush**

Rimless Design

We present our latest technologies to make you stay clean and comfortable when using our toilets. Extra Strong Cyclone Flush is an innovative system to produce powerful cyclone swilling. With less amount of water, this system allows to completely clean the toilet bowl quietly with consistent performance. Only one flush is needed to clean down the waste buildup. The New Rimless Design makes the maintenance is much easier. It streamlines the area that usually hard to reach which could accumulate bacterias inside the bowl. Therefore it helps you to clean the toilet bowl faster, easier, and stay hygiene.
