ISO 9001/14001

ISO 9001 is the internationally recognized standard for the quality management of businesses which is set by the International Standards Organization(ISO). It applies to the processes that create and control the products and services, and prescribes systematic control of activities to ensure that the needs and expectations of customers are met. The assessment is performed through the third-party audit. ISO 14001 is one of the comprehensive set of environmental management standards set by the International Standards Organization(ISO) to address environmental issues

KS(Korean Industrial Standards)

The Konean Industrial Standards is a program to nealize improvement of product quality and productivity, simplification and standardization of transactions, and protection of consumers by means of supplying and utilizing the industrial standards which is established for industrial standardization and national standardization of Korea.

Eco Label

The Eco-Labeling Program aims at providing accurate environmental information to consumers and indudng firms to develop and produce environment-friendly products in line with consumers' preferences by affixing the Eco-Label on products causing relatively less pollution or using less resources in the production and consumption processes among products for the same purpose.

Excellent Quality Competitive Enterprises

It is a system to select, support and advertise companies with good performances by re-evaluating and confirming the results of self-assessment conducted by companies. For this, an evaluation group which is composed of academic and industrial experts make on-the-spot visit and implement evaluation based on the arranged quality competitiveness criteria for construction, manufacturing and public service business.

KC

It is a system to select, support and advertise companies with good performances by re-evaluating and confirming the nesults of self-assessment conducted by companies. For this, an evaluation group which is composed of academic and industrial experts make on-the-spot visit and carry out evaluation based on the arranged quality competitiveness criteria for manufacturing, construction and public service business.

GOOD DESIGN AWARD

The 'Good Design Award' was established in 1985 to facilitate the development of product designs. Under the Industrial Design Promotion Act, the award grants GD(Good Design) mark to superior products after comprehensively examining the aesthetics, functionality, economic values, etc. of the products by the Ministry of Knowledge Economy.

NFS (National Sanitation Foundation International)

NFS is a global certification body which sets rigorous evaluation standards for household products and industrial supplies related to public sanitation and environment and carries out assessment regarding safety and performance based on a neutral position.

Red Dot Design Award

It is one of the world's top three international design contests with a long tradition and history. It is acknowledged as a prestigious guarantee system as the winners joins the ranks of world's top designers once they are awarded at this contest.

SNI (Standard National Indonesia)

SNI is the only standards that apply nationally in Indonesia. SNI formulated by the Technical Committee and confirmed by the BSN. SNI stands for Indonesia National Standard or typically called standard quality for certain product that obtained by way of (third-party) product certification system to determine the conformity of a product with specified requirements through initial testing of samples of product, assessment and surveillance of the involved quality system.

JIS (Japanese Industrial Standards)

JIS is an abbreviation of Japanes Industrial Standards which sets standards such as test methods to verify type, size, quality, performance and safety, etc. of the products. It is used as an indicator for transactions between companies and public procurement and consumers to purchase products with an easy mind as the JIS mark indicates that the product having JIS mark satisfies the standards of JIS.

iF DESIGN AWARD

iF Design Award is one of the world's top thnee international design contest, along with REO DOT of Germany and IDEA of USA. It began in 1953 in Germany, and is organized by International Forum Design.

KS-QEI (Korea Standard - Quality Excellence Index)

The KS-QEI is a comprehensive index developed by the Korea Standards Association and the Korean Society for Quality Management to measure product quality by neflecting the levels of customer satisfaction with products and their characteristics. To compile the index, the two organizations conduct a survey of customers and experts on the quality of and satisfaction with products.

Korea Luxury Brand Awards

It is a prize awarded to excellent products which are differentiated in terms of quality, function, design, market and services, etc. The prize winners are selected by Korea Prestige Brand - Customer's Recognition Index(KPC-CRI) and the Korea Prestige Brand - Characteristic Valuation (KPB-CV) which are conducted by the Open Management Research INC. and Secretariat of the Korea Luxury Brand Awards.

PIN UP DESIGN AWARD

At first, the 'PIN UP Design Award' was called as the 'Korea Industrial Design Award' which was held initially in 1997 and has contributed to the development of industrial design of Korea. In 2008, the name is officially changed to 'PIN UP Design Awards' and started the 2nd taking- off. Since then it is recognized as a world-class design festival with attracting many designers from all over the world and finding out various designs.

History

We take strong leaps to create a world-renowned masterpiece bathroom culture with passion and challenging spirit that have led the bathroom culture of Korea

FOUNDATION OF DAELIM TRADING CO., LTD.

1970. 04 Foundation of Daelim Trading Co., Ltd.

1972. 12 Completion of flatware factory in Yeongdeungpo-gu

1973. 04 Completion of faucet factory in Yangpyeong-dong, Yeongdeungpo-gu

BUSINESS DIVERSIFICATION FOR GROWTH

1975. 11 Started Cookware factory in Incheon

1975. 11 Initial public offering of Daelim Trading Co., Ltd.

NEW CHALLENGES IN THE CHANGING AGE

1980.09 Relocation of faucet factory to Gimpo

1981.12 CEO Lee Jae Woo wins 50 million dollar tower as company of merit in exports

1988.01 Separated from DAELIM Group

ESTABLISHES FOUR MAJOR INDUSTRY SYSTEMS OF STABILITY AND GROWTH

1988. 12 Acquired Gimpo ceramics factory

1989. 04 Foundation of Living Star Co., Ltd.

1990. 06 Established Indonesia joint venture PT. DDI

DOBIDOS BIDET & SENSOR PLANT

HEADQUARTER IN SEOUL

PT. DAELIM DOBIDOS INDONESIA [JAKARTA OFFICE]

PT. DAELIM INDONESIA [FLATWARE PLANT]

JEUNGPYEONG FAUCET PLANT

CHINA GUANGDONG FAUCET PLANT

ORGANIZATIONAL INNOVATION AND SUCCESSFUL OVERCOMING OF IMF

1992.11 Release of electronic bidet for the first time in Korea

1994.05 Established Chinese joint corporation X.G.S.F

1999.01 Changed the company name from Indonesia PT. DDI to PT. DLI

DEVELOPING INTO A GLOBAL CORPORATION

2002.10 Relocation of headquarter from Susong-dong to current Yeonhui-dong

2003.01 Changed the company name from X.G.S.F to DBM

2007.01 Relocation of flatware factory to PT. DLI in Indonesia

2014.01 Completion of the largest faucet factory in the East in Jeungpyeong

2017.11 Selected as competitive company in quality competitiveness for 19 consecutive years

2017.11 Foundation of PT. DAELIM DOBIDOS INDONESIA

Pride

Selected by Ministry of Knowledge and Economy as
Excellent Quality Competitiveness Enterprise consecutively since 1997
Dedicated to the Hall of Fame for the first time in the industry

FB6600C which is the new product of Daelim Trading Co., Ltd. won the world renowned reddot design award and the iF DESIGN AWARD, proving the excellence of our design in the world.

Daelim Trading Co., Ltd. has numerous items that have been selected as good design items by the Korea's representative design certificate system that provides certificate only to excellent products with high quality, design, convenience and safety, leading the bathroom design.

ECO Energy Saving Faucet

What is the ECO Cartridge?

Usually, in case of the single lever mixing faucet, both hot and cold water are controlled by the same handle. Shifting the handle to the right controls cold water, and shifting it to the left controls hot water. And, the center is for the mixing water. However, in case of the ECO Cartridge of the Daelim Trading, the right-to-center section of the lever is for complete cold water. Therefore, it is possible to reduce the use of hot water which is wasted unconsciously.

Effectiveness of the Eco Cartridge

(Sources: Ministry of Economy, Trade and Industry(METI), Ministry of Land, Infrastructure, Transport and Tourism(MLITT))

Category	Water Use Amount	CO_2 Emission	Gas Use Amount	CO_2 Emission	Total
Existing Cartridge	39,000ℓ	23Kg	120.0㎥	264Kg	287Kg
ECO Cartridge	32,400ℓ	19Kg	99.6㎥	220Kg	239Kg
Reduction Amount	6,600ℓ	4Kg	20.4㎥	44Kg	48Kg

- Water pressure : 0.7~7.0kgf/cm2

Touch sensor kitchen faucet

- Water supply and water hold operated by a touch of human body parts.
- Consists of faucet sensor, controller (PCB, Solenoid Valve), and power source (ADAPTER)
- Blue LED is lit only when operating to supply water

- Power : AC 220V/60Hz, DC 9V(constant voltage adapter 600mA used)
- Touch sensing time : within 0.5sec
- During operation: Blue LED ON.
- Automatic water hold: Automatically holds water when not used for 3 minutes.
- Initialization operation : flickering three times when initial power Is input

STORAGE SHOWER

We propose practical and functional shower products that are helpful in utilizing small space in line with the changing trend towards downsizing of residential places and reasonable expenditure trends.

• The basic neat box form provides a sense of practicality. • The multiple-layer structure providing storage space and storage pockets at the side increase practicality and usage.

(piping span 150~180㎜)

Built-in faucet

FM 101

Built-in faucet

BALCONY FAUCET

The OFF operation that naturally continues with the FE 270C spray gun provides a holder function while reducing the OFF step, and when using the spray gun, the lever is positioned in ON direction, providing functionality and usability at the same time.

Patent registration : 10-1210107
