

HEALTHY ENGINEERS

Air Pollution • Kiln Dry • Boiler • General

HEALTHY ENGINEERS is the First Indonesian leading company established in **1985** as **Air Pollution, Kiln Dry, Boiler and General**. We use international Technology Standard to give the best result and accuracy.

With our own plant and facilities, supported by our experience Engineers and skillful Designer, we are able to design, create and manufacture system according to specific needs either for **New System, Retrofit or Fixing Air Pollution Problems**. Our system can be found in thousands of installations all over Indonesia

We always innovative in developing our system to give a step ahead result and solutions efficiently, that also give positive impact clean air to surrounding and environment.

SERVICES

We provide the following services for any kind of industries :

- **NEW MANUFACTURING SYSTEM**

We design and manufacture the whole processing system

- **RETROFIT**

We re-engineer, re-design and modernize existing collector and manufacturing system for the best performance

- **TECHNICAL SERVICE & MAINTENANCE**

Our technical service and maintenance is provided to fix manufacturing problems and maintain the machinery system to prevent failures of the production result

NEWEST INNOVATIVE PRODUCTS

Our newest innovative Products is specially made to drying up Soft Wood such as Sengon Wood / Albasia. We changed from 12 - 14 days Kiln Drying become **only 4-5 days** and made it the fastest Kiln Dry Room in the history

OUR CLIENT

PT. SAKARI SUMBER ABADI

Central Dust Collector

Boiler Furnace

Boiler

GENERAL INDUSTRIES

We design and manufacture custom technology to fulfill the needs of its industries.

This below is some of the technology that used for general industries :

Boiler

- Fire Furnace for any kind of Boiler

Air Pollution System

- Pollution System Control for Coal Fired Boiler
- Air Pollution System for Mining Industries
- Filter Bag House for Building Material Industry

Duct Collector and Transporter

- Powder Collector for Cosmetic Industry
- Duct Transporter for Food and Beverages Industry
- Dust Collector for Food Industry, Pharmaceutical Industry, Chemical Industry

Dryer

- Flour Dryer
- Ceramic Dryer

Spray Booth

- Spray Booth for any Coating Industries

BUILDING INDUSTRIES

We provide services for any kind of building type :

High Rise Building, School, Mall, Superblock and other building types

- Indoor Air Quality System for Buildings and High Rise Building
- Ducting System for Air Conditioner and Building Mechanical
- Pool Heater System
- Water Heater System

Vertical Packed Bed Fume Scrubbers

Rotary Dryer

Filter Bag House (Asphalt Plant)

Conveyor

Water / Swimming Pool Heater

Ducting

Automatic Jet Pulse Filter Bag House

Kiln Dry

Auto Press

Blower

WOOD WORKING INDUSTRIES

We design and manufacture the whole woodworking manufacturing system, from sawmill to the end products delivery, and also for different specific needs of woodworking industries such as furniture processing, plywood processing, barecore processing, finishing system and many other needs.

We re-engineer, re-design and modernize existing collector and manufacturing system for the best performance

PRODUCTS

BOILER

We design and manufacture New boiler and supply Used boilers. We also able to fix and retrofit existing boiler to the complete unit and give the best performance.

Boiler Products :

- Thermal Oil Boiler
- Steam Boiler
- Boiler Furnace

AIR POLLUTION SYSTEM

To fulfill each producer own requirement, we consult, design, create and manufacture custom Air Pollution System with the following products :

- Central Dust Collector : Ducting, Blower, Cyclone, Silo
- Portable Dust Collector
- Automatic Screw Feeding
- Automatic Jet Pulse Filter Bag House

We manufacture any kind of Jet Pulse Filter Bag House that used for woodworking industries and many other industries

- Reverse Filter Bag (Pressure)

KILD DRY ROOM

We design and manufacture Kiln Drying technology for Hard Wood and Soft Wood.

Round Silo

Dust Collector

PORTABLE KILN DRY CONTAINER

A Kiln Dry in a form of Containers that moveable to designated destination for client's convenient

FINISHING SYSTEM (Spray Booth)

We produce Spray booth finishing system that usually used in woodworking industry and also create finishing system that can be used for other industries

INDUSTRIAL FAN DUCTING

We produce industrial fan ducting for Building Mechanical and other Industries

Drying Fan

Spray Booth

Portable Kiln Dry Container

OUR COMPANY GROUP

As the company is growing, we have extended our services for other specific needs.

PRODUCT and SERVICE GUARANTEE

1. Products Warranty

We give **50 years Products Warranty** to give the best service and quality assurance for your business

2. Best Value Price Guarantee

We offer the best competitive price and product value in the market

3. Construction Quality Assurance

We use Construction Calculation Analysis that can produce a precise, strong and sustainable products

4. Product Accuracy Quality Assurance

We give a precise and accurate Technical Calculation Analysis for the need of the products which can be proved and checked by using measurement instruments during Products Testing and after products usage
